

When your students write in English: supporting English-language writing and good decisions about AI

Susannah Parker Ewing

Datum, Uhrzeit und Ort:

Do 18.02.2027

10:00-17:15 Uhr

[HUL](#)

Jungiusstraße 9

Raum 321, 3. Etage

20355 Hamburg

Zuordnung zum Zertifikatsbereich:

4) Prüfen und Feedback geben

(8 Arbeitseinheiten)

Beschreibung:

If the majority of the research in your discipline is published in English, if your students wish to reach an international audience or if they are simply more comfortable writing in English than in German, then they may prefer to submit their research papers in English. Furthermore, as more writers seek to write in languages other than their first language, the use of generative AI in that writing process becomes more prevalent, more self-evident, and perhaps more accepted. But how can that affect their results?

In this workshop we will address the needs of those writing in English, your own needs as you support them, and why and where genAI can be used or avoided in the writing process. Whether your students and researchers are submitting term papers or final theses, you will feel more secure as you help them to achieve best results.

Inhalte:

- Academic Writing in English
- Writing in the Disciplines
- Supporting writers of term papers and exams
- genAI use in research and studies
